Excerpts from 310 CMR 15.000:THE STATE ENVIRONMENTAL CODE, TITLE 5

15.017(8): Approval of Soil Evaluators

(8) Beginning in 2010, at the time of filing a second renewal application in accordance with 314 CMR 15.017(7), a Soil Evaluator shall demonstrate that he or she has earned ten Training Contact Hours in the previous three years that improve the Soil Evaluator's abilities in the following areas:

- (a) to safely and accurately conduct soil evaluations according to the requirements of 310 CMR 15.000;
- (b) the principles of on-site sewage treatment and disposal;
- (c) the geology and soils of Massachusetts;
- (d) soil profile descriptions;
- (e) to accurately estimate high groundwater elevations using soil morphology;
- (f) the methods of documenting site conditions; and
- (g) field training in soil evaluation and logging.

15.340(13): Approval of System Inspectors

(13) Beginning in 2010, at the time of filing a second renewal application in accordance with 314 CMR 15.340(12), a System Inspector shall demonstrate that he or she has earned ten Training Contact Hours in the previous three years that improve the System Inspector's abilities in the following areas:

- (a) the principles of on-site sewage treatment and disposal;
- (b) to safely and accurately conduct system inspections according to the requirements of 310 CMR 15.000;
- (c) to safely and accurately identify and locate systems;
- (d) to safely and accurately assess the condition and function of systems; and
- (e) to safely and accurately determine whether maintenance, including repair or replacement of system components, is necessary.
