

Spring 2024 NWGLDE Meeting – Cheyenne, WY – 4/17/24

Call to order, attendance –

(virtual) Don Taylor, Tim Smith, Bill Hickman, David Wilson, Daniel Lee

(In Person) Oma Gilbreth, Shaheer Muhanna, Greg Bareta, Wesley McCain, Mike Hollis, Dustin Turner

Election Discussion

Group went through each application and discussed pros/cons of each applicant, will schedule election and final ballot count in May.

Team Leaders

ATG/VTT/NVTT – Wesley

Franklin Incon EVOO 200&400 posted 1/5/24 – ATG

VTT/NVTT – nothing new (Craig Wilcox attending open session tomorrow to discuss something regarding using a VR or Franklin with a food grade alcohol product...Listing one manufacturer's pump with another manufacturer's panel)

CITLIDS/SIR – Shaheer

Nada for new listings

Discussion about Dr Gorgi's findings of errors in EPA/KWA protocol. Issue is for KWA (Craig and Jerry Floura) to revise the protocol

LLD – Greg

Contact from Constellation Energy. Using Hansa, trying to use EZ Check instead

PHD Leak just reviewed and drafted, sent to all workgroup members for review/edit this morning.

Interstitial/Out of Tank methods – Tim

PMP requested adding VR TLS 450 to their existing listing, but would need evaluation with the new model and software

AST/Bulk Storage Tanks – Oma

Nada

Secondary/Spill Containment – Mike

Nada

Old Business

Climate factor settings w/CSLD. Facilities changing it in programming to "extreme" which is altering the allowances for the test, in order to pass. Discuss with VR to determine any data/evaluations that include changes in the climate factor setting

Under Review/Not Listed/Review Completed

Don working on sharepoint access

Policy and Procedures Manual

Sharepoint issue

Team Member assignments

No change until new members are on board

New Business

Testing Standardization

Discussion on scope of project

Submission Checklist

Developed long ago and still used, newer members to review and make any needed revisions

Monitoring double wall tank bulkhead

Highland tank makes tanks that are required to monitor the bulkhead. Recently changed brochure to say "may" instead of "required"

Spring 2025 meeting discussion

New Orleans, Chattanooga, or Santa Fe

Vendor Session (Craig Wilcox of KWA in attendance)

Alcohol tank to use third party proprietary vacuum pump in lieu of a typical STP to use interstitial from an Incon EVOO 600. Alcohol to be used to make vinegar, and may be on CERCLA hazardous list.

CITLDS protocol, Craig/Dr Floura will review Dr Gorgi's proposed correction

Craig asking if workgroup would accept pipeline evaluation done on 100 gallons of flex, semi-rigid, and rigid piping, if the listing would cover 300 gallons of rigid pipe, since the bulk modulus would be higher than the flex and semi-rigid.

Field Visit

Visited site in Laramie, WY where two-20k Containment Solutions tanks were being installed. Tanks were placed in the pit and strapped down, with pea gravel backfilling ongoing

New Member Vote tabulation

Dustin Turner, Marci Schneider, and Jason Cocke elected
