

“UST” means a UST as defined in Health and Safety Code section 25281, subdivision (y), except that “UST” means only those USTs that contain only petroleum or, consistent with Federal Act, a mixture of petroleum with de minimis quantities of other regulated substances.

**The de minimis amount of hazardous substance mixed with a petroleum product is that amount in which the additional hazardous substance does not alter the detectability, effectiveness of corrective action, or toxicity of the petroleum to any significant degree.**
