# Emma Gildesgame

## *Environmental Analyst*

Emma Gildesgame serves as the project manager for the Water Quality Standards and nutrient criteria, TMDL, and Mercury programs and their associated workgroups. As part of this work, Ms. Gildesgame coordinates a national webinar series for state and EPA personnel whose work relates to Clean Water Act section 303(d) and TMDLs. Her responsibilities also include management of the Peconic Estuary Program and Long Island Nitrogen Action Plan.

Ms. Gildesgame joined NEIWPC in 2019. Her prior experience includes work in coastal wetland restoration with Audubon California, GIS and communication strategy for the National Parks Conservation Association, and environmental education and outreach across New England, Colorado, and California. She's also worked for the Yale Program on Climate Change Communication as a social media producer and manager. Ms. Gildesgame's graduate work focused on planning for coastal and watershed-scale climate resilience.

### **Education:**

Masters of Environmental Management, Yale University  
(Specialization: Water Resources Science and Management)  
Bachelor of Arts in Environmental Science, Colby College
