

YOU MAY NOW REGISTER

EARLY BIRD REGISTRATION IS OPEN!

Registration is now open for the 11th U.S. Symposium on Harmful Algae to be held on October 23-28, 2022, in Albany, New York, at the Hilton Albany.

The theme for the upcoming symposium is "**Science to Support Solutions from Shore to Shore**". From freshwater to marine systems, the prevalence of harmful algal blooms (HABs) is a national environmental challenge, and solutions are needed. Celebrating this event in New York – the only state with Great Lake shorelines, marine coasts, and the diverse range of ecosystems between these extremes – creates an ideal setting to discuss progress in understanding algal bloom ecology and the solutions necessary to prevent and reduce HABs.

This conference is open to all registrants. Attendees will include national representatives and researchers from academia; state, federal, tribal, and municipal governments; the private sector; and watershed organizations.

Early bird registration is open now through July 8.

Register now to secure your discounted price to this year's U.S. Symposium on Harmful Algae. Standard registration closes September 16.

Please **visit our conference website** periodically for the most current information on the conference.
