Lillian Zemba

Environmental Analyst

Lillian manages NEIWPCC's underground and leaking underground storage tanks (UST/LUST) programs. Working in coordination with the U.S. EPA, her efforts bring together federal, state, and tribal partners from across the country to improve the prevention and cleanup of releases from USTs. In this capacity, Lillian plans and implements the National Tanks Conference, oversees the production of the LUSTLine bulletin, coordinates UST and LUST trainings and webinars, and serves as the technical coordinator for the Tribal UST/LUST Workgroup and the EPA Region 1 UST/LUST Workgroup.

Prior to joining NEIWPCC, Lillian worked as an environmental scientist for the Underground Storage Tank program at Rhode Island Department of Environmental Management. In this role, she conducted compliance inspections, oversaw closures of USTs, and managed LUST remediation projects. She also conducted research and interpreted UST regulations to create reference materials and provide training on procedures for overseeing UST closures and LUST projects. She also worked as a staff scientist for Environmental Resources Management, where she drafted reports for remediation projects and performed field investigations for compliance projects involving groundwater, soil and air sampling.

Education:

B.S., Environmental Science, State University of New York College of Environmental Science and Forestry

Licenses:

Rhode Island Class A/B UST Operator
