

27th NATIONAL TANKS CONFERENCE

**Susan Sullivan
Executive Director
NEIWPC**

[NŪ-Ē-PĪK]

NEIWPCC is a regional commission that helps the states of the Northeast preserve and advance water quality.

KEY AREAS OF WORK AND IMPACT

CONNECTIONS

We engage and convene water quality professionals and other stakeholders across the Northeast to collaborate on clean water and environmental science challenges across shared regions, ecosystems, and areas of expertise.

PROTECTION

We conduct research into water-related topics, monitor environmental factors, and fund such work by others. We also implement and fund environmental restoration and other on-the-ground projects.

TRAINING

We develop, coordinate, and conduct training courses that serve water quality professionals regionally and nationwide.

EDUCATION

We fund and/or staff programs that engage the public through events, exhibits, web and print publications, and other outreach activities.

ENGAGEMENT

We actively represent the interests of member states at meetings with federal and state officials and in regional and national water and wastewater associations.

NEIWPCCC

• MISSION •

To advance clean water in the Northeast through collaboration with, and service to, our member states.

• VISION •

Clean and sustainable water throughout the Northeast.

• VALUES •

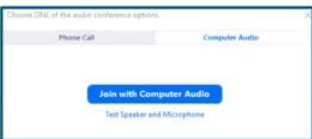

Leadership • Collaboration • Education • Service • Science

USING ZOOM

Your **Dashboard** is located on the bottom of the Zoom screen.

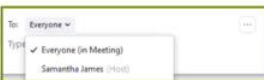

Participants are **muted** by default and in listen-only mode.

Audio Options:

1. Use your **computer's** speaker and microphone.
2. Call by **phone** using the number and Meeting ID provided via registration.

Q&A: Use the **Chat** function to submit a question or comment. You can message **Everyone**, or privately message the Host with **questions**.

L.U.S.T.LINE

A Report On Federal & State Programs To Control Leaking Underground Storage Tanks

Introducing NEIWPCC

With this launch, the organization that has been helping you L.U.S.T. line for the past 30 years is dedicated to breaking its previous record by being the first to launch a new publication. NEIWPCC (NEIWPCC) is a regional organization that helps the Northeast states preserve and address water quality and environmental concerns. The organization's mission is to provide information, training, and technical assistance to help states and localities address environmental and water quality issues. The organization's mission is to provide information, training, and technical assistance to help states and localities address environmental and water quality issues.

Redeveloping Petroleum Brownfields

We all have our share of old abandoned gas stations dotting the landscape of our states. On the flip side, we have areas experiencing rapid economic growth, where redevelopment programs may identify the potential for brownfields and solutions are affordable. However, making the business case for cleanup can be a real challenge.

In this three-part series, you can read about some creative and strategic approaches implemented in Colorado and Washington to help overcome such challenges to petroleum brownfield redevelopment. Both of these states have developed voluntary programs that provide financial assistance to owners and operators, enabling them to address aging infrastructure and potential liabilities associated with the former operation of petroleum storage tanks on their properties.

We will explore great process improvements to our programs and offer assistance the good and not so good to help. Our focus is mostly on the technical merits of the improvements, but we may not spend enough time on communicating those improvements through marketing and outreach. The best science and financial incentives are meaningless if the target audience is unaware of the opportunity. So to address this, the third article in this series highlights the importance of marketing and outreach and provides tips on how to do it.

Contributed on page 2

Inside

- 1. Redeveloping Petroleum Brownfields in CO, WA, and HI
- 2. LUST Lines: Finding Petroleum Storage
- 3. The State of the Tank Trailing
- 4. LUST Lines: Marketing Possibilities
- 5. Planning and Best Practices
- 6. Tanking Up PEIs in PE States
- 7. PEI: From LUST to LUST
- 8. What's Up With LUST?
- 9. Complete Checkup to Fuel in Country
- 10. Tank Lines From NEIWPCC
