Jennifer Lichtensteiger

Environmental Engineer

Jennifer Lichtensteiger joined NEIWPCC's Wastewater Division in 2018, where she advances municipal wastewater projects and supports training across the Northeast.

Ms. Lichtensteiger identifies and addresses regional priorities for wastewater residuals with NEIWPCC's Workgroup and Commissioners, sharing perspectives, collaborating, and engaging with stakeholders locally and nationally. She also assists with municipal wastewater projects, such as revising technical guides and management training programs for Massachusetts and Connecticut wastewater operators.

Ms. Lichtensteiger is an experienced environmental professional with thirty years of experience in environmental remediation project research, design, management, permitting, and implementation. She has previously held environmental consulting positions and is experienced in managing the design and construction of sediment, soil, and groundwater remediation projects. Before joining NEIWPCC, she developed and implemented training to facilitate the exchange of information and provide a documentation tool for the Loss Prevention System™, a behavior-based safety system. Ms. Lichtensteiger completed research investigating the oxidation of the gasoline additive methyl tertiary-butyl ether in groundwater using hydrogen peroxide catalyzed by ultraviolet light.

Education:

M.S., Civil Engineering, University of New Hampshire

B.S., Interdisciplinary Engineering and Management, Clarkson University

Memberships:

New England Water Environment Association

Water Environment Federation

Massachusetts Water Pollution Control Association
