# Alex DuMont

## *Environmental Analyst*

Alex assists with a variety of projects in support of NEIWPCC's Water Quality programs. He serves as the project manager for the Long Island Sound Study (LISS), working closely with LISS staff; Connecticut Department of Energy and Environmental Protection and New York State Department of Environmental Conservation (NYSDEC) on research, monitoring, and public education and outreach initiatives. He organizes the wetlands and New England Biological Assessments of Wetlands workgroup meetings and presents information to stakeholders and the general public.

Prior to joining NEIWPCC in February of 2024, Alex served as a research and GIS intern for NYSDEC, where he developed analysis methodology for quantifying and mapping informal trail networks in the Catskill Mountains, produced maps, and presented work to staff at the central office. Prior to that experience, he was a GIS intern with the department's Division of Water, where he created a series of regulatory maps as part of an update to Long Island Total Maximum Daily Load reports, worked with staff to complete GIS projects, and maintained an organized filing system to ensure continued use of GIS maps and projects. He also served as a seasonal field ecologist for the Nantucket Land Bank, where he delineated wetlands, participated in town planning, and monitored coastal biological communities.

### **Education:**

M.S., Biodiversity, Conservation, and Policy, University at Albany (in progress)  
B.A., Psychology, Brandeis University  
Graduate Certificate, GIS and Spatial Analysis, University of Albany

### **Affiliations:**

Association of Clean Water Administrators  
National Association of Wetlands Managers
