Maryann Dugan

Program Manager

As a program manager for NEIWPCC's Water Quality Division, Maryann Dugan is project manager of the Northeast Aquatic Biologists, Volunteer Monitoring, and Harmful Algal Bloom workgroups.

To accomplish the goals of these workgroups, Ms. Dugan facilitates regional collaboration and serves as coordinator for various meetings and events, including the annual Northeast Aquatic Biologists Conference. She is also responsible for applying for grant opportunities and managing contracts related to water quality monitoring, aquatic biology, harmful algae blooms, and community science. Additionally, Ms. Dugan supervises the nonpoint source pollution staff at the Lowell Headquarters office and oversees the NEIWPCC contract with, as well as the staff at, the Rhode Island Department of Environmental Management.

Prior to joining NEIWPCC in 2019, Ms. Dugan worked as an environmental specialist, leading a water quality sampling and biological monitoring program for the Florida Department of Environmental Protection's South District. She has also previously served as a field operations supervisor and an assistant consultant in coastal dune restoration as well as an aquatic biologist in lake and wetland management.

Education:

Bachelor of Science in Public Affairs: Environmental Management, Indiana University
